

"I am an Italian Wedding Photographer in Tuscany and this may sound cliché, but I adore my job. I adore photographing real, authentic people who are not afraid of showing their real feelings, their laughter and their tears, their emotions and their fears. I love people who remove all the filters and shields hiding their real personality from my lenses. The couples who choose me don't need to pretend to be what they are not, and I love them for allowing me to catch their true essence."

“ La vita è bella”

Travel expenses outside of the above areas
will be quoted case by case .

The film service, available upon request, complements the digital service with a series of shots taken with a classic 24x36 film camera, using Ilford black and white film. The film service does not replace the digital service. Further details on the price and features of the film service are explained in the film price list, which is sent separately upon customer request

The Film Camera service requires the presence of the second photographer .

Drone photos are taken at the photographer's discretion, depending on weather conditions, the internal rules of the venue (as some venues prohibit it), and the logistics and timing of the wedding. If the client has specific requests regarding drone photos, they can inform our studio when finalizing the wedding details.
